

**Quaqtaq, QC
Montréal Area Control Centre (ACC) – Peripheral Station (PAL)**

NAV CANADA, the country's provider of civil air navigation services, has evaluated the aviation communication requirements in the Quaqtaq area for the provision of Air Traffic Control messages.

As a result of this evaluation NAV CANADA will implement a Peripheral Station (PAL) in the vicinity of the Quaqtaq Airport to better serve aviation communications in the area. The following PAL will be established:

- A new Montréal ACC PAL frequency 134.8 MHz will be established. Pilots operating above FL290 in the vicinity of Quaqtaq Airport who require Air Traffic Control services should contact Montréal ACC (call sign Montréal Centre) on this new frequency.

This change will take effect August 27, 2009 at 0901 Coordinated Universal Time (UTC).
The appropriate aeronautical publications will be amended.
