

**Ottawa/Gatineau Airport, Québec
Flight Information Services En Route (FISE)**

NAV CANADA, the country's provider of civil air navigation services, has evaluated the provision of Flight Information Service En Route (FISE) using Remote Communication Outlets (RCO). As a result of this evaluation NAV CANADA has embarked upon a multi-year RCO redesign program aimed at improving FISE service coverage and reducing frequency congestion on 126.7MHz.

To achieve these objectives and better serve aviation communication requirements in the Ottawa/Gatineau area, the following FISE RCO change will be made:

- The Ottawa/Gatineau FISE RCO frequency will change from 126.7 MHz to **123.375 MHz**. Pilots operating in the vicinity of Ottawa/Gatineau who require flight planning, weather or NOTAM information should contact the Québec FIC (call sign "Québec Radio") on this new frequency.

This change will take effect February 11, 2010 at 0901 Coordinated Universal Time (UTC). The appropriate aeronautical publications will be amended.
