

### **Notification of Puvirnitug NDB Outage**

NAV CANADA wishes to inform its customers that the Non-Directional-Beacon (NDB) at Puvirnitug, Québec will be unavailable during the summer of 2010, as part of Air Navigation Systems relocation.

The current NDB supports instrument procedures to runway 01 and 19. As a result of the relocation project, the NDB will be unavailable for approximately two months. During this period all other navigation aids at the airport will remain operational to maximize airport accessibility.

The planned outage period for the NDB is from **11 July to 15 September 2010**. Dates are subject to change depending upon weather conditions and contractor availability. Actual dates of scheduled outage will be published via NOTAM. Pilots should carefully monitor the NOTAM before and during the maintenance period for specific dates of the outage or other related disruptions.

NAV CANADA regrets any inconvenience to its customers; however, the importance of this navigation aid is recognised and every effort will be made to restore Puvirnitug NDB at Puvirnitug as quickly as possible.

If you require any additional information regarding this notice, please contact:
