

**Campbell River Airport  
Notification of ILS Glide Path Outage**

NAV CANADA wishes to inform its customers that the Instrument Landing System (ILS) Glide Path (GP) for runway 11 at the Campbell River Airport will be re-located due to runway extension during the summer of 2010.

During this period all other navigation aids at the airport will remain operational to maximize airport accessibility.

The planned outage period for the runway 11 ILS GP is from 01 June 2010 to 18 November 2010. Dates are subject to change depending upon weather conditions and contractor availability. Actual dates of scheduled outage are published via NOTAM. Pilots should carefully monitor the NOTAM during construction period for specific dates of the outage or other related disruptions.

NAV CANADA regrets any inconvenience to its customers; however, the importance of this navigation aid is recognised and every effort will be made to restore ILS GP operations on Runway 11 at Campbell River Airport as quickly as possible.
