

WEATHER CAMERA (Wx Cam) SURVEY

NAV CANADA's Aviation Weather Camera's (Wx Cams) are an important resource used by pilots across the country. As we plan future deployments and upgrades, we want your feedback to ensure Wx Cams continue to successfully support pilot decision-making and ensure safer flight operations.

We are conducting a survey, **to be completed by January 25, 2018**, to better understand your Weather Camera needs, and to enhance our deployment policy.

Your feedback will support future upgrades and the integration of weather, NOTAM, electronic flight-plan filling for domestic flights, and aeronautical information from the Aviation Weather Web Site (AWWS) and through our network of Flight Information Centres.

Please access the survey through the following link:

<https://www.surveymonkey.com/r/HY9BZG5>

By continuously investing in technology and service, we can improve on safety and flight efficiency.
