

# Aeronautical Study Plan

## ADS-B Mandate

### Scope of Study

The aeronautical study will determine the requirement for a Canadian ADS-B Out performance requirement mandate in the Canadian Domestic Airspace using a phased approach as follows:

1. Class A, B and FL600 and Above (Class E).
2. Class C Airspace, Class D Control Zones and Class E Control Zones.
3. All other controlled airspace.

The Aeronautical Study will determine the implementation plan. Consultations for each phase will be based on system impact and affected customers and stakeholders. This will include IFR and VFR operations.

NAV CANADA will consult with customers and stakeholders on this aeronautical study during the Fall 2017 to Spring of 2018.
