

AERONAUTICAL INFORMATION CIRCULAR 4/19

CHANGE IN HOURS OF AIRPORT AIR TRAFFIC CONTROL SERVICES WINNIPEG/ST. ANDREWS, MANITOBA (CYAV)

NAV CANADA, the country's provider of civil air navigation services (ANS), has assessed the hours of operation for the air traffic control (ATC) service at the Winnipeg/St. Andrews airport (CYAV). As a result, we concluded that the hours could be increased by opening one hour earlier in the morning each day.

This aeronautical information circular (AIC) outlines the operational change that resulted from the addition of hours. The new hours of the airport ATC service are 07:00 to 22:00 local time (1300Z to 0400Z central standard time [CST] or 1200Z to 0300Z central daylight time [CDT]).

- The control zone (CZ) becomes Class D airspace at the new published control tower hours beginning each day at 07:00 local time (1300Z CST or 1200Z CDT); and
- Outside of the hours of operation of the control tower, the airport will continue to revert to a Class E control zone with an aerodrome traffic frequency (ATF), on 118.5 MHz.

This change took effect on 7 January 2019 at 0901Z Coordinated Universal Time (UTC). The appropriate aeronautical publications will be amended.
