

## AERONAUTICAL INFORMATION CIRCULAR 8/19

### REVOKE SUPPLEMENTAL INSTRUMENT APPROACH PROCEDURES: NATIONAL

NAV CANADA, the country's provider of civil air navigation services, conducted an aeronautical study that reviewed the requirement for non-directional beacons (NDBs) and very high frequency omnidirectional rangefinders (VORs).

The study concluded that given the comprehensive radar surveillance coverage, and the capabilities of area navigation (RNAV) with global navigation satellite system (GNSS) equipped aircraft, many navigation aids (NAVAIDS) are no longer required and should be decommissioned. In combination with the reduction in NDB and VOR NAVAIDS, the study also considered the remaining inventory of instrument approach procedures (IAP) available at Canadian airports and aerodromes. In addition to the instrument approach procedures to be revoked because of NAVAID decommissioning, the following instrument approach procedures are assessed to be supplemental and can be revoked without reducing airport access.

Aerodrome	Ident.	IAP to be Revoked
