

NOTICE

CAMBRIDGE BAY, NUNAVUT REPLACEMENT OF THE 'CB' NDB

NAV CANADA has determined that the Cambridge Bay 'CB' high power Non Directional Beacon (NDB) tower is no longer structurally sound and must be demolished. A new 160' NDB tower will be constructed in the same location. The NDB will be out of service during the demolition and construction work, which is expected to last 4 weeks and is planned to begin late October.

The new NDB will be high-power; however it will not have the same range as the current NDB. This will result in changes to the enroute infrastructure supported by this NDB.

Please monitor NOTAMs for the exact date and time of the NDB outage, and monitor Notices and AICs for advance notice of changes to enroute publications.
