

APRIL 2014

NOTICE OF CONSULTATION

**REVIEW OF THE STRUCTURE AND CLASSIFICATION OF THE MONTREAL
TERMINAL CONTROL AREA**

NAV CANADA will be undertaking an aeronautical study to review the structure and classification of the Montreal terminal control area.

As the provider of civil air navigation services, NAV CANADA regularly reviews its services to ensure that they match the requirements of aircraft operators. The study will involve consultation with customers and other stakeholders. A hazard and risk analysis will be conducted on any proposed changes.

Further information is available in the NAV CANADA web site page Windsor-Toronto-Montreal Airspace and Services Review which can be obtained at:

<http://www.navcanada.ca/EN/products-and-services/Aeronautical%20Studies/Aero-Study-Active-WTM%20Review-EN.pdf>

Consultation on this proposal will be conducted during the spring of 2014. Persons wishing to be identified as stakeholders, wanting to obtain further information or interested in commenting on this study are invited to notify the study team leader at the address below:
