

NOTICE OF CONSULTATION

AVIATION WEATHER OBSERVATIONS CARTWRIGHT, LABRADOR

NAV CANADA, the country's provider of civil air navigation services is conducting an aeronautical study to review the method for conducting aviation weather observations at the Cartwright airport. Currently, observations are provided by a 24-hour Contract Weather Office (CWO). The study will examine if the CWO can be closed and instead provide weather observations with an Automated Weather Observation System (AWOS).

Further information is available in the Terms of Reference (TOR) document available on the NAV CANADA web site at:

[Cartwright TOR](#)

NAV CANADA will consult with customers and stakeholders on this aeronautical study during the Spring of 2017. For questions regarding this study, please contact:
