

## **Gander International Airport (CYQX)**

### **Notification of ILS Outage**

NAV CANADA wishes to inform its customers that the Instrument Landing System (ILS) for runway 03 at the Gander International Airport will be temporary out of service in order to relocate the glide path and sustain the precision approach services.

The planned outage period for runway 03 is from **17 August – 21 September, 2017**. Dates are subject to change depending upon weather conditions and contractor availability. Actual dates of scheduled outage will be published via NOTAM. Pilots should carefully monitor the NOTAM before and during the construction period for specific dates of the outage or other related disruptions.

During this period all other navigation aids at the airport will remain operational to maximize airport accessibility.

Furthermore, NAV CANADA is developing RNAV (GNSS) procedures, LNAV, LNAV/VNAV and LPV to maintain access to runway 03.

NAV CANADA regrets any inconvenience to its customers and recognizes the importance of this navigation aid; every effort will be made to restore ILS operations on runway 03 at the Gander International Airport as quickly as possible.
