

NOTICE OF CONSULTATION

Localizer (LOC) & Distance Measuring Equipment (DME) Havre St-Pierre, Roberval, Chevery, Quebec

NAV CANADA, the country's provider of civil air navigation services is conducting an aeronautical study to review the requirement for the localizer (LOC) and distance measuring equipment (DME) at the Havre St-Pierre (CYGV), Roberval (CYRJ) and Chevery (CYHR) airports, Quebec.

The LOCs at these airports are due for lifecycle replacement. With the prevalence of RNAV (GNSS) equipped aircraft that use these airports and the establishment of GNSS instrument approach procedures as mitigation, there may no longer be a requirement to retain the LOC/DME equipment.

Additional information is available in the Terms of Reference (TOR) document located on the NAV CANADA web site via the following link:

[Link to TOR](#)

NAV CANADA will consult with customers and stakeholders on this aeronautical study during the Spring 2017. For questions regarding this study please contact:
