

NOTICE OF CHANGE

MODIFICATION OF AIRSPACE AT CALGARY INTERNATIONAL AIRPORT (CYYC)

CALGARY, ALBERTA

NAV CANADA, the country's provider of civil air navigation services, conducted an assessment of the airspace at the Calgary International Airport (CYYC).

The assessment concluded that the airspace around the airport should be updated to the new airport geographic center coordinate (AGCC) to correct for a shift cause by the completion of an additional runway in 2014.

The following airspace will be updated with the new AGCC:

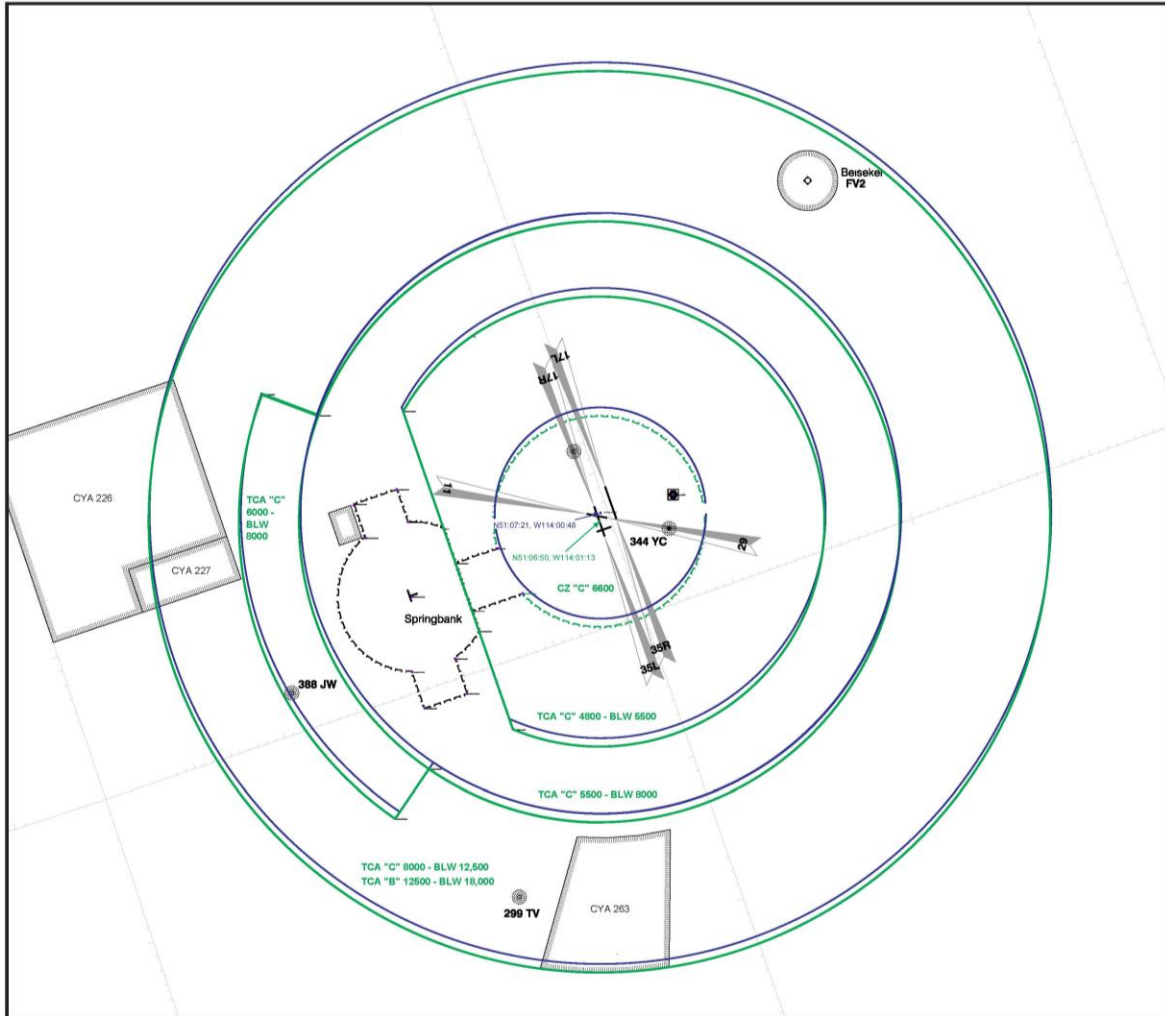

Control Zone

- Within a 7 nautical mile (NM) radius from the surface to 6,600 feet above sea level (ASL), Class C

Terminal Control Areas

- Within a 15 NM radius, east of the Calgary/Springbank Airport (CYBW) control zone, 4,800 to below 5,500 feet ASL, Class C
- Within a 20 NM radius, 5,500 to below 8,000 feet ASL, Class C
- An area 20 to 24 NM west, 6,000 to below 8,000 feet ASL, Class C
- Within a 30 NM radius, 8,000 to 12,500 feet ASL, Class C and 12,500 to below 18,000 feet ASL, Class B
- Within a 30 NM radius, above 12,500 to below 18,000 feet ASL, Class B

This change will result in the affected airspace moving approximately 0.6 NM to the northeast.

— Old/Vieux CYYC AGCC (N51:06:50, W114:01:13)
— New/Nouveau CYYC AGCC (N51:07:21, W114:00:48)

NOT FOR NAVIGATION

This change will take effect on 10 Sep 2020 at 0901 Coordinated Universal Time (UTC). The appropriate aeronautical publications will be amended.
