

AIP CANADA SUPPLEMENT 1/22

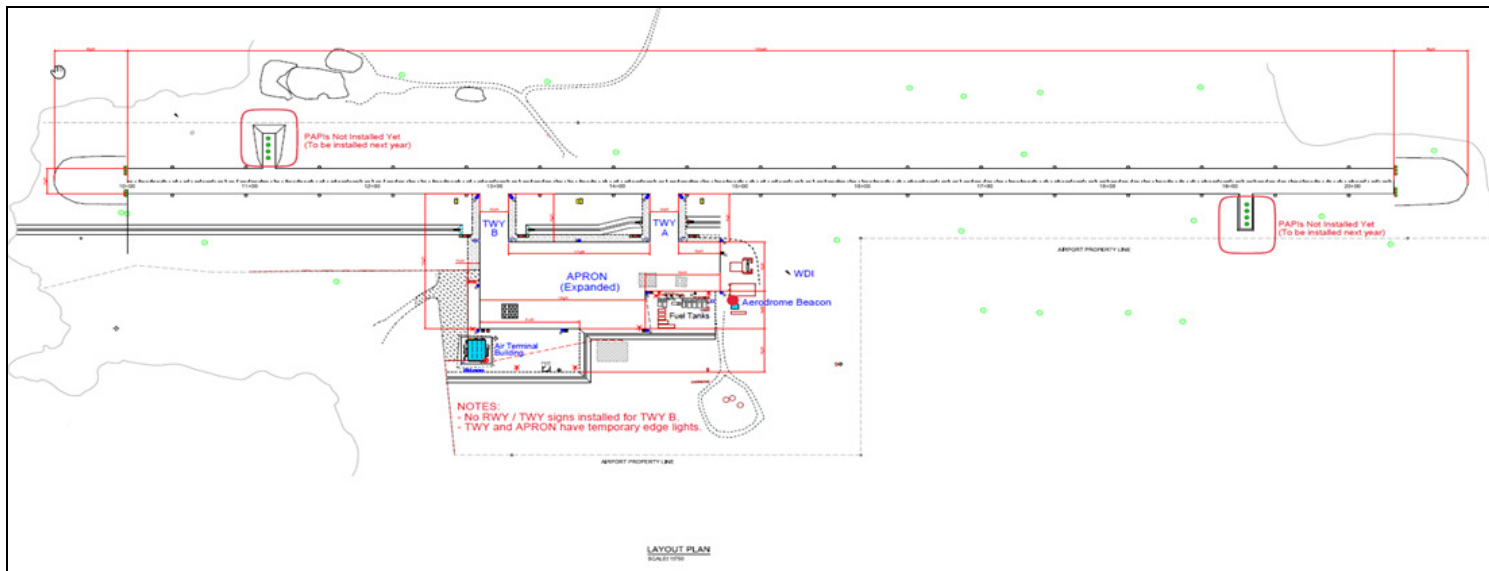

UPGRADE OF AIRPORT LIGHTING SYSTEM, APRON, AND TAXIWAY AT ST. THERESA POINT AIRPORT, MANITOBA (CYST)

Starting on 23 November 2021, airport authorities indicated that some construction work for a multi-year project was completed. This work included:

- expansion of the apron;
- relocation of the terminal; and
- opening of Taxiway Bravo.

The drawing (below) shows the dimensions (in metres) of the runway, the taxiways (TWY A and TWY B) and the apron (widened).

It should be noted that the electrical upgrade (edge lighting / signs / PAPI, etc.) must be carried out next year (summer 2022). Temporary edge lights are currently installed at the site, but no runway or taxiway signage is installed.
